A CATALOGUE OF

GREEK VASES

In the Collection of

THE UNIVERSITY OF MELBOURNE

at

THE IAN POTTER MUSEUM OF ART

THE CATALOGUE OF THE UNIVERSITY'S COLLECTION OF GREEK VASES is now published as a sumptuous, colour-illustrated, 208-page, cloth-covered volume, and as a CD ROM. Each differs in content and is designed to complement its counterpart. They can be used separately, or interactively, and together will suit students, researchers and interested readers.

THE RICHLY ILLUSTRATED BOOK, a collectors' item designed and produced to full library specifications, has been generously supported by The Ian Potter Foundation and is published by Macmillan Publishers Australia. It offers the complete scholarly apparatus for study of the vase collection, one of the finest in the country. It is intended for use in undergraduate and postgraduate teaching, in public education programs and in schools-particularly where classics, archaeology and art are studied. The catalogue is a product of the most outstanding Classical Studies department in Victoria, and as a book will be added to library shelves throughout the world. The book is the first volume in a series planned to feature various aspects of the University's wider Collections

The CD ROM, generously supported by The Gordon Darling Foundation and produced by the Multimedia Education Unit of The University of Melbourne, is of unparalleled sophistication. Its 629 additional full-colour, high-resolution images and 62 rotatable object movies are far more numerous than would be feasible in print. It is designed to modernise the study of classical artefacts and to inspire young students to study classics, archaeology and art history at university.

Although a collaborative project, involving many contributors, the major research has been conducted by the late Peter Connor, and by Heather Jackson, with the assistance of John Burke.
